

## Prof. Diana L. Robins, Ph.D.

---

**Prof. Diana L. Robins, Ph.D. je profesorkou a ředitelkou Institutu Autismu A. J. Drexela na Drexel University.**

Doktorka Robins působí v Community Health and Prevention v Dornsife School of Public Health and Psychology na College of Arts and Sciences na Drexel University.

Získala doktorát z klinické psychologie s důrazem na klinickou neuropsychologii na Univerzitě v Connecticutu.

Po své stáži schválené Asociací Amerických Psychologů na Floridské Univerzitě v Centru zdravotních věd absolvovala dvouletou postdoktorandskou stáž na Yale University ve Studijním Centru Dětské Medicíny.

Do r. 2014 působila 10 let na fakultě Státní Univerzity v Georgii na katedře psychologie a Institutu Neurověd.

Velká část její práce se soustředila na vývoj, ověřování a zdokonalování široce používaného screeningového nástroje pro poruchy autistického spektra u batolat M-CHAT (Modified Checklist for Autism in Toddlers).

**Původní práce M-CHAT byla citována více než 2000krát** a aktualizovaná verze M-CHAT-R s následnou studií M-CHAT-R/F, prokázala, že 2-stupňový screeningový dotazník dokáže odhalit mnoho případů autismu. Děti ve studii byly diagnostikovány asi o dva roky dříve, než ukazuje národní medián, což zlepšuje včasné řešení poruch autistického spektra.

Současné studie zkoumají optimální věk pro screening primární péče pro odhalení rizika autismu. Zároveň spojují včasné odhalení v primární péči a včasné řešení autismu s pozitivními výsledky dítěte do pěti let věku.

Výzkum byl financován Národním Institutem Dětského zdraví a Lidského Rozvoje Eunice Kennedyové a Národním Institutem Duševního zdraví. Její práce byly publikovány v předních pediatrických časopisech a časopisech o autismu. V současné době působí v představenstvu Mezinárodní Společnosti pro Výzkum Autismu.

Je nositelkou prestižních cen a vyznamenání, v roce 2017 byla zvolena do statutu člena v American Psychological Association, Division 33 (Intelektuální a vývojová postižení), v letech 2007 až 2012 byla Principal Investigator v National Institutes of Health pro Loan Repayment Program.

Je velmi ráda, že její program na Drexelově Institutu Autismu přitahuje studenty věnující se veřejnému zdraví, psychologii a medicíně, protože tak mohou společně pracovat na postupech v rámci veřejného zdraví ke zlepšení včasného odhalení a řešení poruch autistického spektra.
